

Article Overview

Ladder-type cable trays in ASEAN typically range from \$20 to \$100 per 2.4-meter section, depending on material, thickness, and supplier.

Overview of Ladder-Type Cable Trays

Ladder-type cable trays are designed for heavy-duty cable support, offering open-rung construction for maximum airflow, corrosion resistance, and easy cable routing, making them ideal for industrial and outdoor installations . They are commonly made from hot-dip galvanized steel, stainless steel, or aluminum, with standard lengths of 2.4 meters per section . Accessories such as bends, tees, reducers, and supports are priced per unit.

Typical Price Ranges

- o Hot-dip galvanized ladder trays (2.4 m): Approximately \$20-\$50 per section depending on thickness and load capacity .
- o Stainless steel or heavy-duty trays: Can range from \$60-\$100 per section for higher corrosion resistance and industrial applications .
- o Fittings and accessories: Bends, tees, and reducers are usually priced per piece, ranging from \$5-\$30 depending on size and material .

Regional Considerations in ASEAN

- o Prices vary by country due to import duties, shipping costs, and local manufacturing.
- o Suppliers like Traytek (Indonesia) and Alibaba offer bulk and wholesale options suitable for ASEAN projects .
- o Local distributors may provide factory-direct pricing and discounts for large orders, which can reduce costs significantly .

Recommendations

- o Check supplier catalogs for exact specifications, thickness (commonly 1.8 mm or higher), and load ratings.
 - o Compare local vs. imported options to balance cost and quality.
 - o Include accessories in your budget, as bends, supports, and connectors are essential for complete installation.
- By considering these factors, you can estimate costs and plan procurement for ladder-type cable trays in ASEAN projects effectively .
