

Article Overview

Vertical cable trays in Algeria typically range from approximately 5,000 to 15,000 DZD per standard unit, depending on material, size, and supplier.

Market Overview

The Algerian cable tray market is driven by infrastructure modernization, energy projects, and industrial expansion, with demand concentrated in the energy, construction, and industrial sectors (). Vertical cable trays, often used for routing cables between floors or along walls, are part of this broader market, which includes ladder, perforated, and channel types. Prices are influenced by material choice, corrosion resistance, and project specifications.

Material and Type Considerations

- o Mild Steel (Galvanized): Common for heavy-duty industrial applications; offers durability but heavier weight. Standard lengths are typically 2.4 meters, with fittings priced per unit ().
- o Aluminum or Pre-Galvanized Steel: Increasingly used for lighter weight and corrosion resistance, especially in coastal or specialized facilities ().
- o Vertical Configurations: Prices may be slightly higher than horizontal trays due to custom fabrication and additional fittings required for vertical installation.

Price Ranges

Based on local suppliers and online listings ():

- o Standard galvanized vertical cable trays: ~5,000-10,000 DZD per 2.4-meter section.
- o Aluminum or corrosion-resistant trays: ~10,000-15,000 DZD per section.
- o Fittings and accessories (elbows, tees, supports): priced individually, typically 500-2,000 DZD per piece depending on size and complexity.

Supplier Options

- o Local Fabricators: Offer customization and faster delivery; prices may vary based on project volume ().
- o International Suppliers: Imported trays may be more expensive due to shipping and compliance with Algerian standards ().
- o Retail Platforms: Websites like Ouedkniss provide listings for both new and fabricated trays, allowing comparison of prices and materials ().

Practical Tips

- o Project Planning: Consider total cost including trays, fittings, and installation labor.
- o Material Selection: Choose based on environmental conditions (humidity, coastal exposure) and load requirements.
- o Bulk Orders: Often reduce per-unit cost, especially for large industrial or energy projects.

In summary, vertical cable tray prices in Algeria vary widely depending on material, size, and supplier, with standard galvanized trays starting around 5,000 DZD and premium aluminum or corrosion-resistant options reaching 15,000 DZD per unit. Careful selection of material and supplier can optimize both cost and longevity for industrial or infrastructure projects ().

This report provides an in-depth analysis of the Cable Trays market in Algeria, including market size, structure, key

Cable Trays and Accessories are designed to meet most requirements of cable and electrical wire installations and comply to local

Need help selecting the right cable ladder or -tray for your project? We offer a wide range of cable tray

Shop Our Inventory Of Cable Tray And Fittings Online. Graybar Is Your Trusted Distributor For Conduit, Raceway And Cable Support.

Bahra Electric Cable Trays are an essential component of any well-designed electrical infrastructure,

Welcome To Cable House Cable Tray Manufacturers In Algeria Started back in 1983, Cable House is a recognized name engaged in

Découvrez nos câbles industriels de qualité supérieure, conçus pour garantir performance, fiabilité et durabilité dans les

Galvanized Cable Tray As part of our excellent Cable Tray Range, we are proud to offer super strong Galvanized Cable Trays.

Create profitable strategy to import Cable trays in Algeria with Top Cable trays exporting importing countries, Top Cable trays

Cable tray, trunk and ladder price list as a average prices for some approved suppliers as (emeco, Novo, egy tray
