

Article Overview

Andorra offers a diverse range of box-type distribution boxes, including surface-mounted, flush-mounted, single-phase, three-phase, and lighting-specific models for residential, commercial, and industrial applications.

Overview of Distribution Boxes

Distribution boxes, also known as DB boxes, are central hubs for safely distributing electrical power from a main supply to multiple circuits. They house protective devices such as circuit breakers, fuses, and switches, ensuring both equipment protection and user safety . These boxes are essential for managing power in homes, commercial buildings, and industrial facilities.

Types of Box-Type Distribution Boxes in Andorra

o Surface-Mounted Distribution Boxes

- o Installed directly on walls, ideal for retrofits and industrial environments.
- o Provide easy access for maintenance and upgrades .

o Flush-Mounted Distribution Boxes

- o Embedded into walls for a clean, aesthetic appearance.
- o Commonly used in residential and commercial buildings.
- o Metal versions, such as the Metalbox by Solera, offer IP40 and IK07 protection against dust, moisture, and mechanical impact, with capacities ranging from 14 to 56 modules .

o Pole-Mounted Distribution Boxes

- o Designed for outdoor applications, including street lighting and utility networks.
- o Provide weather-resistant enclosures for safe outdoor operation .

o Single-Phase and Three-Phase DB Boxes

- o Single-phase: Suitable for residential properties and small commercial loads.
- o Three-phase: Used in industrial and large commercial facilities requiring higher power capacity .

o Lighting Distribution Boxes

- o Dedicated to managing lighting circuits with integrated protection.
- o Often lightweight and suitable for secondary distribution in various industries, such as the XRM lighting distribution box available in Andorra .

o Power and Control Distribution Boxes

- o Power DB Boxes: Support sockets, equipment, and heavy machinery.

o Control DB Boxes: Integrate control components like relays, contactors, and timers for automation and industrial control systems .

Key Features and Considerations

- o Voltage Levels: Low-voltage (400V/690V) and medium-voltage enclosures (up to 12kV) are available depending on application .
- o Construction: Typically made from cold-rolled or stainless steel with electrostatic spray coating for corrosion resistance .
- o Protection Ratings: IP and IK ratings ensure safety against dust, moisture, and mechanical impact.
- o Modularity: Many models allow for expansion and integration with accessories for customized installations .

Applications

- o Residential: Single-phase or flush-mounted boxes for home circuits and lighting.
- o Commercial: Three-phase or surface-mounted boxes for offices, shops, and small industrial setups.
- o Industrial: Heavy-duty three-phase, control, and power distribution boxes for factories, plants, and infrastructure projects.
- o Outdoor Utilities: Pole-mounted boxes for street lighting and public electrical networks . Andorra's product offerings cover a rich and diverse system of distribution boxes, ensuring compatibility with various installation environments and electrical requirements .
