

Thorlabs offers lapping (polishing) sheets to polish a connector after the fiber has been epoxied into the ceramic ferrule. Polishing or Lapping Film is composed of

TW-950A Fiber Optic Ceramic Ferrule End Surface Grinding Toolbox field grinding construction Toolkit kit contains all of the latest popular fiber optic tools and

Double-end face grinders are versatile machines capable of grinding a wide range of materials, including traditional metals, ceramics, and plastics. This adaptability makes them valuable

The ceramic ferrule is a key part in the optical fiber connector and has the characteristics of high strength, good corrosion resistance, good insulating property, smooth surface, long service life and

Operating on a much smaller footprint than the competition, this system excels at thrufeed grinding hard materials such as steel, carbide,

NEOPL-2000P is a new type of grinding machine with built-in software and PLC control system. 50 sets of grinding parameters are preset inside the machine.

Imagine a machine that can seamlessly enhance the precision, efficiency, and versatility of your industrial grinding processes. Welcome to the world of CNC

The invention discloses an end face cleaning device for a ceramic ferrule, which comprises a fixed seat, a mounting hole, an elastic chuck, a driving element, a support assembly, a motor, a connecting

Machine: Machine polishing allows for very repeatable end-face surface finish because ferrules are held securely, pressure is applied extremely

CNC end face grinders are specialized machines used to precisely grind the flat ends of cylindrical or disc-shaped workpieces. These machines are essential in metalworking industries for

The ceramic ferrule high-precision end surface grinding machine is simple and reasonable in structure, convenient to control, high in grinding precision and capable of satisfying the vertical degree

Equipment, Ltd. is proud to introduce our automatic CNC Face Grinding Machine for carbide tipped saw blades. This heavy duty compact machine incorporates

Ceramic ferrule end face grinding machine

PC is micro-spherical grinding and polishing. The surface of the ferrule is ground into a slightly spherical surface. The fiber core is located at the highest point of the bend so that the two fiber end faces are

Our ferrules and sleeves are available in standard size and shape configurations. For standard products, please see the following. Kyocera can machine the end

The company is mainly engaged in Die-casting machine, CNC Punching machines, Powder compacting machine and other new intelligent machine and related

It is with high rigidity casting body and the stability is excellent. It can grind large
