

Article Overview

You can request a free quote for a waterproof edge data center from providers like ModulEdge, SBA Edge, and Edge Centres, all offering modular, scalable, and climate-resilient solutions.

Key Providers and Solutions

ModulEdge offers prefabricated modular data centers in 20-ft and 40-ft ISO containers, supporting 4 to 16+ racks with power densities from 5 to 150 kW per rack. Their enclosures are ruggedized to withstand dust, sand, humidity, vibration, and extreme temperatures from -35 °C to +52 °C, making them suitable for waterproof and harsh environments. Each unit includes racks, UPS/power, cooling, fire suppression, monitoring, and access systems, and can be deployed in 3-6 months with Tier III/IV design principles. SBA Edge provides Modular Data Center as a Service (MDCaaS), delivering prefabricated, self-contained edge data centers to your location. These units are scalable, flexible, and designed for distributed and mobile workloads. They offer multiple interconnection options, high-speed network access, and a fixed monthly fee covering maintenance and operations. Edge Centres specializes in resilient, secure edge data centers with flexible rack space, customizable power and cooling, redundant N+1 power architecture, and enterprise-grade security. They provide carrier-neutral connectivity, remote hands, monitoring, and management services. Custom configurations, including waterproofing and high-density setups, are available upon request.

How to Request a Free Quote

- o Visit the provider's website:
 - o ModulEdge: moduledge.com
 - o SBA Edge: sbaedge.com
 - o Edge Centres: edgecentres.com
- o Fill out the contact or quote request form with your requirements:
 - o Number of racks or compute capacity
 - o Power density per rack
 - o Cooling preferences (DX, chilled water, adiabatic, free cooling)
 - o Site conditions (waterproofing, temperature range, humidity)
 - o Deployment timeline and location
- o Specify any additional features such as AI-ready configurations, EMP shielding, or mobile deployment.
- o Submit the form to receive a customized quote and consultation from the provider.

Benefits of Modular Waterproof Edge Data Centers

Free quote for waterproof edge data center

- o Rapid deployment (3-6 months) compared to traditional builds
 - o Scalable and redeployable design
 - o Climate-resilient and waterproof enclosures
 - o Integrated power, cooling, fire suppression, and monitoring
 - o Supports high-density workloads, AI, and distributed computing
 - o Reduced total cost of ownership and predictable performance
- By contacting these providers, you can obtain a free, customized quote tailored to your operational needs, ensuring your edge data center is both waterproof and optimized for your workloads.
