

How much does an outdoor server rack cost

Article Overview

Outdoor server racks typically range from EUR430 to over EUR4,500 depending on size, features, and IP rating.

Price Ranges

- o Small to mid-sized racks (e.g., 6U to 12U, wall-mounted or compact units) are priced around EUR429.60 to EUR806.58 excluding VAT, suitable for limited outdoor installations or smaller network setups .
- o Larger, freestanding outdoor racks with more capacity and robust construction can cost between EUR3,167.34 and EUR4,596.37 excluding VAT, ideal for industrial or enterprise-level deployments .

Features Affecting Price

- o IP Rating: Most outdoor racks are IP55, meaning they are dustproof and protected against water sprays, which is essential for outdoor use .
- o Construction: Welded steel cabinets with lockable doors and reinforced mounting points increase durability and cost .
- o Ventilation: Built-in fans and covered ventilation holes prevent overheating while keeping water out, adding to the price .
- o Size and Capacity: Height is measured in U (rack units), typically ranging from 6U to 18U, and depth can vary, affecting both price and suitability for different equipment .
- o Accessories: Shelves, cable ducts, and power strips for 19-inch equipment can increase the overall cost .

Buying Considerations

When selecting an outdoor server rack, consider the number and type of devices, future expansion, and environmental exposure. Smaller racks are cost-effective for limited setups, while larger, fully-featured racks provide long-term protection and flexibility for enterprise networks . For current pricing and options, suppliers like MEMIDOS and ServerSchrack24 offer a wide range of outdoor server racks with same-day shipping and professional advice .
