

Article Overview

Pricing for French trough-type cable trays varies widely depending on material, size, and surface treatment, typically requiring a direct quote from suppliers.

Key Factors Affecting Price

o Material

- o Carbon steel is generally the most cost-effective option.
- o Stainless steel (SS304L or SS316L) is more expensive due to corrosion resistance and durability .

o Dimensions

- o Heights range from 15 mm to 150 mm, and widths from 50 mm to 600 mm .
- o Larger trays or those with higher load capacity cost more.

o Surface Treatment

- o Options include electro-galvanized, hot-dip galvanized, and powder-coated finishes .
- o Hot-dip galvanization and powder coating increase price due to enhanced corrosion protection.

o Load Capacity and Design

- o Trough-type trays are lightweight yet capable of heavy loads, with simple structures for quick installation .
- o Features like perforated bottoms, shielding for sensitive cables, and modular fittings can affect cost.

o Supplier and Order Volume

- o Prices vary by manufacturer and distributor. Bulk orders may reduce unit cost.
- o European suppliers like Eurostrut and Ekabel24 recommend requesting a quote for accurate pricing .

Recommended Approach to Obtain Pricing

- o Request a Quote Online: Many suppliers, including Eurostrut, provide online quote forms for specific tray dimensions and materials .
- o Provide Specifications: Include tray width, height, material, surface treatment, and quantity.
- o Consider Accessories: Fittings, covers, and mounting hardware may be priced separately.

Typical Applications

- o Industrial facilities, telecommunications, oil and power industries.
 - o Suitable for control cables, computer cables, and sensitive systems requiring shielding and corrosion protection .
- Summary: While exact prices are not publicly listed, trough-type cable trays in France are priced based on material, size, surface treatment, and quantity. For precise pricing, it is recommended to contact
