

Price of Nordic type vibration optical cable

Article Overview

The exact price of a Nordic Vibration Optical Cable varies depending on specifications, length, and supplier, typically ranging from EUR20 to EUR150 per meter for standard fiber optic cables, with customized or industrial-grade options costing more.

Pricing Overview

The cost of a Nordic Vibration Optical Cable depends on several factors:

- o Cable type and specifications: Single-mode or multi-mode fiber, vibration-resistant design, and connector type can significantly affect the price. Industrial-grade or vibration-tolerant cables are generally more expensive than standard office or data center cables.
- o Length: Fiber optic cables are usually priced per meter, with longer runs often offering bulk discounts.
- o Customization: Tailor-made solutions for harsh environments, such as offshore, defense, or industrial applications, can increase the cost due to specialized manufacturing and testing processes .
- o Supplier and region: Nordic suppliers like Navigator Nordic and Foss Fiber Optics provide both standard and customized solutions, often with lifetime warranties and local support .

How to Obtain Accurate Pricing

- o Request a Quote: Contact suppliers directly through their websites. For example, Navigator Nordic offers a range of optical cables and components for the Nordic market, and they provide expert support for pricing and delivery .
- o Specify Requirements: Include cable length, vibration tolerance, connector type, and intended environment to get an accurate quote.
- o Compare Suppliers: Consider multiple Nordic suppliers, including Foss Fiber Optics, which manufactures both standard and bespoke fiber optic solutions in Norway and Slovakia .
- o Check for Bulk Discounts: Larger orders or long-term contracts may reduce the per-meter cost.

Typical Price Range

- o Standard fiber optic cable: EUR20-EUR50 per meter
- o Vibration-resistant or industrial-grade cable: EUR80-EUR150 per meter
- o Custom or harsh-environment solutions: Prices can exceed EUR200 per meter depending on specifications and testing requirements . For the most accurate and up-to-date pricing, it is recommended to contact Nordic suppliers directly with your specific requirements. This ensures you receive a quote tailored to your project and environment.
