

Price of fiber optic cable trays for duct laying

Article Overview

Fiber optic cable trays for ducts typically range from \$20 to \$150 per unit depending on material, size, and configuration.

Price Overview

- o PVC Fiber Ducts: Standard PVC trays, such as 120mm x 2000mm yellow ducts, are budget-friendly options, often priced around \$20-\$50 per 2-meter section. These are lightweight, fire-retardant, and easy to install with tool-less connectors .

- o Modular or Halogen-Free Trays: High-quality modular systems like YellowDuct(R) or LSZH (Low Smoke Zero Halogen) trays are designed for data centers and structured cabling projects. Prices for these systems are higher due to fire safety compliance, recyclability, and modularity, typically ranging from \$80-\$150 per section, depending on size and accessories .

- o Industrial or Metal Trays: Fiber optic cable tray ducts made from steel, aluminum, or fiberglass (ladder, solid-bottom, trough, or wire mesh types) are used in heavy-duty or industrial applications. Pricing varies widely based on material and load capacity, generally \$50-\$200 per meter, with custom configurations potentially higher .

Factors Affecting Cost

- o Material: PVC is cheaper, while LSZH, steel, or aluminum trays cost more.

- o Size and Length: Longer or wider trays increase material costs.

- o Fire Safety Ratings: LSZH or UL94-V0 rated trays are more expensive due to compliance with safety standards .

- o Modularity and Accessories: Trays with elbows, tees, risers, and tool-free connectors add to the total cost .

- o Supplier and Location: Prices vary by supplier, shipping, and regional availability. Many suppliers, including Fiber Savvy and Primus Cable, recommend contacting them for custom quotes based on project requirements .

Recommendation

For accurate budgeting, it is advisable to request quotes from multiple suppliers and consider the total cost of ownership, including installation, accessories, and compliance with safety standards. Suppliers like Fiber Savvy, Primus Cable, and Mulder-Hardenberg provide tailored advice and can help design a tray system that fits your duct infrastructure .
