

Article Overview

Rolling or rotating network cabinets typically range from \$200 to over \$1,500 depending on size, material, and features.

Price Range

- o Basic portable/rolling network racks start around \$200-\$300 for small 6U-12U units suitable for home offices or small IT setups (Amazon, Newegg) .
- o Mid-range rolling cabinets with larger capacity (18U-24U), reinforced steel frames, and lockable doors generally cost \$400-\$800 .
- o High-end or specialized rolling cabinets for data centers, with features like soundproofing, advanced airflow, or outdoor-grade materials, can exceed \$1,000-\$1,500 .

Factors Affecting Price

- o Size (U units): Larger cabinets cost more due to additional materials and shipping weight. A 6U unit is much cheaper than a 42U floor-standing rolling cabinet .
- o Material: Steel is standard and affordable, while aluminum or corrosion-resistant coatings increase cost by \$100-\$300 .
- o Mobility Features: Casters, locking wheels, and rotating mechanisms add to the price. Heavy-duty wheels for large cabinets are more expensive .
- o Additional Features: Lockable doors, perforated panels for airflow, soundproofing, and cable management accessories can increase the price .

Cost-Saving Tips

- o Used cabinets: Platforms like eBay offer used rolling cabinets starting around \$200, often in excellent condition .
- o Smaller units: For limited space or budget, a compact 6U-12U rolling cabinet is sufficient for routers, switches, and small servers .
- o Compare retailers: Amazon, Newegg, and Graybar provide a range of options with varying features and shipping costs . In summary, when budgeting for a rotating or rolling network cabinet, expect to pay \$200-\$1,500 depending on size, material, and additional features, with used options offering significant savings for basic applications.
