

SI-20 distribution box dimensions

Article Overview

The SL-20 distribution box typically has dimensions of approximately 520 mm x 420 mm, suitable for standard installation and pipe connections.

Physical Dimensions

The SL-20 distribution box is designed for compact and versatile installation. Based on the NITTO KOGYO SL series, the board or cabinet dimensions are 520 mm in width and 420 mm in height . Depth is generally proportional to accommodate internal modules and wiring, though specific depth may vary slightly depending on the manufacturer.

Material and Protection

SL-20 boxes are built to provide robust protection, often rated up to IP56 for dust and water ingress and IK07 for impact resistance . This ensures durability in both indoor and outdoor environments.

Pipe and Module Compatibility

For irrigation or wastewater applications, similar 20-inch distribution boxes, like the Polylok 20" model, can accept 2", 3", 4", and 6" pipes and allow flexible inlet/outlet placement . SL-20 boxes are compatible with standard distribution modules and risers, making them adaptable for various installation heights and configurations.

Installation Notes

- o Can be mounted above or slightly below grade with risers.
- o Suitable for both small and large applications due to modular design.
- o Ensure proper sealing and alignment to maintain IP protection and prevent water ingress. In summary, the SL-20 distribution box measures approximately 520 mm x 420 mm, offers high protection ratings, and supports flexible piping and module configurations, making it suitable for a wide range of electrical or fluid distribution applications .
